High Frequency Tests

A. Copyright (CO, Cap.528) Tests

在检验什么 (适用问题)	步骤 + 判断 (决策树)	Test / Doctrine	Authority	Output Line
要解决 "作品版权到底归谁" 的问题: 雇员关系下是否归雇主当然取得, 或仍由创作者/受雇方保留。	先定身份 (employee / independent contractor) → 若为 employee, 再看是否 in course of employment; 若是, 通常归雇主。若为 freelancer/commissioned, 则先看合同是否有有效分配/转让条款; 若无, 再补审 s.15(2) 法定权利后下结论。	Employee vs freelancer ownership test	Cap.528 s.14(1), s.15(1), s.15(2)	"Ownership does not automatically pass to the hiring party for freelancer work; absent assignment, analyse s.15(1) contract terms and s.15(2) statutory rights."
要解决 "是否已取用到受保护内容" 的问题: 被取用部分是否达到实质部分门槛。	先定位被取用内容 → 再判断其是否体现原作原创性核心表达/结构/编排 (重质不重量) → 若是, 即使数量不大也可满足实质部分要件; 若仅属非原创或琐碎内容, 通常不满足。	Substantial part test (qualitative)	Cap.528 s.22(3); case law approach	"Although quantitatively limited, what was taken is qualitatively substantial, so s.22(3) is met."
要解决 "平台/管理者是否要为他/人侵权负责" 的问题: 是否构成授权侵权。	看被告是否控制工具/平台 + 是否知悉或应知侵权风险 + 是否已采取合理防范措施 → 若控制/从知明显且防范不足, 较可能认定授权; 若缺乏控制或已合理限缩, 较不易成立。	Moorhouse authorisation test	UNSW v Moorhouse: Cap.528 s.22(2), s.22(2A)	"Given control + knowledge + inadequate preventive steps, D likely

				authorised primary infringement under s.22(2)."
要解决 "境外复制制品在香港如何定性" 的问题: 是否被授权复制品处理。	做事实判断: 若该复制品改为在香港制作, 是否会侵权 → 若会, 则在香港可视为 infringing copy, 并可触发相关次级侵权责任; 若不会, 则通常不成立或路径。	Hypothetical manufacture test for infringing copy	Cap.528 s.35(3)	"Under s.35(3), the imported copies are treated as infringing copies because local hypothetical manufacture would infringe."
要解决 "被告使用是否可受公平处理抗辩" 的问题: 是否属于 fair dealing。	依四因素审查 (用途性质、原作品性质、取用比例与实质性、市场替代影响) → 再整体评估是否与作品正常利用冲突 → 若整体公平, 抗辩较可能成立; 若替代市场明显且取用过度, 通常不成立。	Fair dealing 4-factor test	Cap.528 s.38(3), s.39(4), s.39A(2), s.41A(2), s.37(3)	"On the four factors, the dealing substitutes the original market and is unlikely to be fair."

B. PDPO (Cap.486) Tests

在检验什么 (适用问题)	步骤 + 判断 (决策树)	Test / Doctrine	Authority	Output Line
要解决 "这批信息是否受 PDPO 规制" 的问题: 是否构成 personal data。	看是否关乎在世个人 + 是否可直接/间接识别 + 是否处于 data user 控制/持有场景 → 三者满足时通常构成 personal data, 进入 DPP 义务框架; 否则相关义务通常不触发或明显减轻。	Personal data threshold test	Cap.486 s.2(1)	"The dataset is personal data because individuals are identifiable from linked identifiers and account records."
要解决 "新用途是否合法" 的问题: 现用途是否超出原收集目的且缺乏同意。	先定原收集目的 → 判断现用途是否属于 new purpose → 若是, 继续查是否有有效 prescribed consent 与证据链; 若无有效同意, 通常违反 DPP3; 若非 new purpose 或同意完整, 风险下降。	New purpose + prescribed consent test	DDP3 + Cap.486 s.2(12)	"The marketing/doxxing use is a new purpose and is unlawful absent prescribed consent under DDP3."
要解决 "数据保安是否合规" 的问题: 是否已采取合理可行安全措施。	按 DPP4 要素核查: 最小权限、访问控制、日志审计、离职权限回收等数据安全管理 → 若关键环节缺失, 较可能不合规; 若措施系统且可证明执行, 较能支持合规立场。	DDP4 practicable security test	DDP4	"Given weak access controls and missing audit safeguards, DDP4 non-compliance is likely."
要解决 "DAR 能否整体拒绝" 的问题: 是否应部分履行而非一概拒绝。	先审请求是否针对 requester 本人 personal data → 若复杂第三方信息, 先做删改/遮蔽部分披露 → 仅在适用法定例外时拒绝, 且需逐项给出 s.20 理由; 无充分理由的 blanket refusal 风险高。	DAR partial compliance test	Cap.486 ss.18-21, esp. s.20	"The data user should provide a redacted response rather than blanket refusal, with specific s.20 reasons for withheld parts."
要解决 "是否构成 doxxing 责任" 的问题: 行为是否满足法定构成要件。	按要件逐层判断: 是否未经同意披露 + 是否具伤害意图/旁观 (加重型) 是否出现实际伤害或持续扩散 → 要件齐备则可能触发 s.64 责任; 若关键要件缺失或抗辩成立, 责任不成立或减轻。	Doxxing elements test	Cap.486 s.64(1), (3)/(3A)/(3B)/(3C)/(3D)	"The postings likely satisfy unauthorised disclosure and harm-intent elements, engaging s.64 doxxing liability."

C. Patent (Cap.514) Tests

在检验什么 (适用问题)	步骤 + 判断 (决策树)	Test / Doctrine	Authority	Output Line
要解决 "未字面落入时是否仍侵权" 的问题: 变体是否按等同原则落入保护范围。	依 Actavis 三问: Q1 是否同方式同结果; Q2 等同是否对本领域技术人员显而易见; Q3 技术人员是否仍理解为必须严格按照字面遵守 → 若 Q1/Q2 是且 Q3 否, 通常落入等同范围; 反之通常不落入。	Actavis 3-question equivalence test	Actavis UK v Eli Lilly [2017] UKSC 48; Cap.514 s.73	"Applying Actavis, Q1/Q2 are yes and Q3 is no, so the variant is likely within claim scope by equivalence."
要解决 "侵权对比基础是否正确" 的问题: 是否先完成 claim construction。	先解释权利要求文字与必要技术特征 → 再逐项映射被诉产品/方法 → 若未先做或做错 claim construction, 后续侵权对比通常不稳固; 解释正确后再进入逐项对比才有说服力。	Claim construction first	Cap.514 s.73; lecture method	"The infringement analysis starts with claim construction; only then can the alleged product/process be mapped to each essential integer."
要解决 "该发明能否作为可专利主题继续审查" 的问题: 是否落入 s.9A 排除客体。	Aerotel 四步: 1) properly construe claim; 2) identify actual contribution; 3) 判断披露是否各整数 s.9A 排除范围; 4) 判断该贡献是否具技术性实质 → 若仅属排除客体且无技术性贡献, 则不能获专利; 否则可继续审查新颖性与创造性。	Aerotel 4-step excluded subject matter test	Aerotel v Telco [2006] EWCA Civ 1371; Cap.514 s.9A(2)	"On Aerotel step 3/4, the contribution is (pure business rule / technical), so s.9A exclusion [does / does not] apply."
要解决 "专利是否缺乏新颖性" 的问题: 是否被单一在先公开完整预见。	锁定 material date → 寻找单一可实施公开 (文献/公开使用) → 逐项核对必要特征是否全部已公开 → 若单一公开已覆盖全部必要特征, 则新颖性被破坏; 否则该障碍不成立。	Novelty full anticipation check	Cap.514 s.9B + s.2(1)	"Because one prior disclosure contains all claim integers before the material date, novelty under s.9B is destroyed."
要解决 "专利是否缺乏创造性" 的问题: 区别特征是否显而易见。	先识别区别特征 → 以本领域技术人员视角判断该区别是否显而易见 (避免 hindsight) → 若显而易见, 不满足 s.9C; 若不显而易见, 可通过创造性门槛。	Inventive step obviousness check	Cap.514 s.9C	"The only difference is [...], which would be obvious to the skilled person; s.9C is therefore not satisfied."

答卷句型

Scenario	English Sentence	Use When
法条引入	Under Cap.[xxv] s.[x], the court should examine [Element 1] and [Element 2] in sequence; on these facts, the key issue is whether those statutory elements are satisfied.	任何问开头
争点切分	This sub-question raises three distinct issues: [Issue A], [Issue B], and [Issue C], each of which should be addressed separately to avoid conflating liability tests.	多争点题
分析顺序声明	I will analyse this in the following order: (1) applicability, (2) primary liability, (3) defences, and (4) remedies / penalties.	开头先立结构
结论保留	On the current facts, X is likely to constitute [infringement / contravention]; however, liability may be reduced if D proves the [specific defence] under s.[xx].	需要平衡双方
最小假设	Without adding unnecessary assumptions, it is reasonable to assume [A] because the question expressly states [B].	老师要求 minimal assumptions
主体拆分	The analysis should be separated for A (actor), B (platform/employer), and C (right holder), with each party tested against the statutory elements independently.	多主体题
民刑分流	The same facts may trigger both civil and criminal routes: civilly under s.[...], and criminally under s.[...], each with different thresholds.	版权/私隐常见
要件逐项测试	Element [1] is satisfied because [...]. Element [2] is also satisfied because [...]. The only arguable weakness lies in Element [3], which depends on whether [...].	按分点写作
证据不足保守写法	On the present record, there is insufficient evidence to conclusively establish [Element]; therefore, the safer view is that this point remains arguable rather than proved.	事实不完整
反方论证衔接	The defendant may argue that [...]; however, that argument is weak because it does not address the statutory requirement that [...].	写双方观点
法条-事实紧扣	The legal test turns on [keyword in statute], and the fact most directly relevant to that keyword is [...].	防止空泛背法条

Copyright: 作品识别	The first step is to identify each protected work separately (e.g. source code, artwork, text, soundtrack), because infringement is assessed work by work.	版权入口

Copyright: 实质部分	The question is not literal identity but whether a substantial part was taken in quality and importance, not merely in quantity.	复制/改编争议
Copyright: communication to public	Uploading or making the work available to users on demand is likely communication to the public under s.28A, even without permanent download.	平台/串流题

替代责任分流	If the employee acted in the course of employment, the employer may be vicariously liable for the civil wrong; if not, liability must be analysed as the employer’ s own subsequent conduct.	HW2 MDC 关键分叉
s.64(1) 要件核查	Liability under s.64(1) requires proof that the data was obtained from the data user without consent, then disclosed with gain/loss intent; failure on the first limb defeats the offence.	HW2 doxxing 子题

答案结构收束	Accordingly, the strongest answer structure is: identify specific acts, map each act to one section, test every element, then conclude civil and criminal consequences separately.	作业与考试通用

Exam Drawbacks: Quick Fixes

- Do not lump acts together. Analyze each act in a separate paragraph (e.g., copying s.23, issuing s.24, authorisation s.22(2), secondary infringement s.31).
- Cite exact sub-sections. Write s.118(1)(g) instead of just s.118.
- Separate civil and criminal routes. Civil liability may succeed while criminal liability fails due to higher mens rea / prejudice thresholds.
- Use Hong Kong statutory language only. Avoid US terms like “derivative work” and “public display right” .
- State minimal assumptions explicitly. Add one short line identifying the assumption and why it is necessary.
- PDPO doxxing two-tier structure: s.64(3A) focuses on intent/recklessness (actual harm not required). s.64(3C) requires actual specified harm.
- Specified harm must fit s.64(6) categories (harassment/threat, bodily or psychological harm, safety concern, property damage), and may include harm to family members.
- Civil redress under s.66 includes injury to feelings (s.66(2)), not only financial loss.
- Statutory defences matter: check s.64(4) (crime prevention, lawful authority, consent, lawful news activity + public interest).
- Vicarious liability defence: employer may rely on s.65(3) only if it proved all practicable preventive steps.
- Copyright “public” threshold: corporate seminar attendees can be a sector of the public.
- s.27 vs s.28A must be separated: showing on screen to people physically present is not automatically communication to the public.
- Artistic-work trap: do not force diagrams into s.27; evaluate correct route (often secondary infringement analysis).
- Substantiality is qualitative first, not pure word-count.
- Authorisation test (s.22(2)): focus on sanction/approval/countenance and control over infringing use.
- For s.31/s.118, always test knowledge: “knew or had reason to believe” .
- Criminal prejudice under s.118(1)(g)/s.118(2A) requires real economic prejudice analysis against the owner’ s actual trade.
- Patent/copyright methodology common rule: identify legal issue -> map exact section -> test each element -> conclude with confidence level and key uncertainty.
